

Nilfisk

The new generation of Nilfisk central vacuum cleaners

European Motors

595 to 727

Air Watts Motor

Patented active noise reduction system operates at 64.5 db with HEPA muffler. The power unit can be mounted in a basement or garage without disturbance. Save on heating and cooling costs by not exhausting air out of your home. We do not use heat retaining foam with our patented noise reduction system and this increases motor life

Replaceable HEPA exhaust muffler with sealed motor system promotes a healthy, dust-free and odour-free environment without having to outside vent.

On/Off switch on all models for manual operation of power unit.

Wireless variable speed controller plugs into all models for use with the exclusive Nilfisk tapered hose while straight air cleaning

Soft start triac control panel reduces inrush current for extended motor life and enables our 10 or 15 year warranty

Easy to install machine mounting bracket for simple machine installation

Rear suction relief valve protects the motor and control panel from overheating in case the line ever gets blocked

Large Double Swivel pail handles ease bucket removal, carrying and emptying

Utility inlet supplied for cleaning next to the power unit.

Convertible 6.7 Gallon dump pail or 23 litre disposable bag for simple, economical dust free disposal

Powerful European made motors produce up to 727 Air Watts at the motor fans and up to 300 Air Watts at hose end. This is up to 20 % more than competition machines, even those with more claimed air watts at the motor. This higher end of hose performance cleans better even in larger homes.

Snap closed, low volt terminals will not let wires vibrate free.

Electronic LCD diagnostic display indicates when the bucket is full and continually monitors motor use and motor brush life (Supreme LCD)

Standard 120 volt 2 pin power cord for flexible installation options

Commercial duty 1000 hour or 1500 hour motors are guaranteed for 10 or 15 years of trouble free operation

European size Power Unit is 31 high and 14 wide so it can be installed even in tight spaces

Durable ABS construction is guaranteed for life

Neoprene rubber filter seal gives maximum performance with minimum maintenance plus protection if not replaced

Reversible left or right intake flex pipe for simple flexible installation

Permanent, washable, commercial duty self-cleaning filter offers superior motor protection and easy maintenance with 10 year guarantee

Quiet, Powerful, Durable. European Quality with standard HEPA filtration. The Nilfisk Advantages
