

# NILFISK®

## WORKS FOR GENERATIONS

Patented active noise reduction system operates at 64.5 db with HEPA muffler. The power unit can be mounted in a basement or garage without disturbance. Save on heating and cooling costs by not exhausting air out of your home. We do not use heat retaining foam with our patented noise reduction system and this increases motor life

Replaceable HEPA exhaust Muffler with sealed motor system promotes a healthy dust free and odor free environment without having to outside vent

HRV low volt connection system will turn the home ventilation system on in modern high efficiency houses (CV30i)

Slow start triac control panel reduces high start up current for extended motor life and enables a 10 year warranty

Easy to install machine mounting bracket for simple machine installation

Rear suction relief valve protects the motor and control panel from overheating incase the line ever gets blocked

Large contoured pail handles ease bucket removal, carrying and emptying

Convertible 6.7 Gallon dump pail or 5.3 Gallon disposable bag for simple, economical dust free disposal

Powerful 586 Air Watt, 127" Suction European motor gives 280 air watts at hose end. This is up to 20% more than competitive machines, even those with more claimed air watts at the motor using up to 14.5 amps. This higher end of hose performance cleans better even in the largest homes

Snap closed low volt terminals will not let the wires vibrate loose

Electronic LCD diagnostic display indicates when the bucket is full and continually monitors motor use and motor brush life (CV30i)

Standard 3 meter power cord for flexible installation options

Commercial duty 1000 hour life motor is guaranteed for 10 years of trouble free use

European size Power Unit is 31" high and 14" wide so it can be installed even in tight spaces

Durable ABS construction is guaranteed for life

Neoprene rubber filter seal gives maximum performance with minimum maintenance plus provides automatic motor protection if not replaced

Reversible left or right intake flex pipe for simple flexible installation

Permanent, washable, commercial duty self cleaning filter offers superior motor protection and easy maintenance with 10 year guarantee

**Quiet, Powerful, Durable. European Quality with standard HEPA filtration. The Nilfisk Advantages**
